

Grace Kelly Microsite – Review Notes

Home page: there is a typo “becaming” change to “becoming”

I’m not loving the circles, I think I liked the pictures in rectangles before. I do like the blue stroke on the outside though!

I still think it would be nice to see pops of red too. Maybe half the pictures have blue and have the pictures have a red stroke.

Under the legacy page, there isn’t a photo. See if you can find one! There’s tons online.

Under the about page, try using this photo instead:

<https://www.realsimple.com/home-organizing/decorating/grace-kelly-childhood-home>

On the home page, “Hollywood” needs to be capitalized the same way “Actress” is

Under the Princess tab, the cursive heading is spelled wrong. Should read “Princess of Monaco” Currently, it says princess of monoaco.

The responsiveness is generally pretty good until the site gets very small. I’m not sure how important it is that it is responsive, but if you have time, that’s another small thing to consider.

Overall, looks great! I would just change the photos to rectangles, add some red, and fix the typos!

Thanks!
